RESEARCH PROFILE

Computational modeling for biomedical image analysis, with emphasis on brain tumor segmentation, recurrence classification, survival prediction, physics-informed models, domain adaptation, and uncertainty quantification.

EDUCATION

PhD, Electrical & Computer Engineering ? Old Dominion University, 2018?July 2026 (expected)
M.Sc., Electrical & Electronic Engineering ? University of Dhaka, 2014?2016
B.Sc., Electrical & Electronic Engineering ? University of Dhaka, 2010?2014

RESEARCH EXPERIENCE

Graduate Research Assistant, Vision Lab ? Old Dominion University, Aug 2018?present
? Developed UNCE-NODE, a neural ODE-enhanced U-Net with roughly 30% fewer trainable parameters.
? Built recurrence and survival models reaching AUC 0.892 and approximately 0.77, respectively.
? Designed uncertainty-aware ensemble nnU-Nets; team placed 8th in AMOS 2022.
? Studied adult-to-pediatric domain shift, reaching whole-tumor DSC 0.879.

TEACHING & MENTORING

Teaching Assistant, Senior Design, 2021?present; Teaching Assistant, Circuits, Linear Systems & Signals, 2019?2025; Course Instructor, Circuit Analysis, 2017; NSF REU mentor, 2022?2023.

TECHNICAL SKILLS

Python, MATLAB, R; PyTorch, TensorFlow, Keras, scikit-learn; U-Net, nnU-Net, neural ODEs, transformers, domain adaptation; FSL, FreeSurfer, 3D Slicer, ANTs, SimpleITK; CUDA, Docker, Slurm/HPC.

HONORS & SERVICE

SPIE conference support (2022, 2023); AMOS 2022 8th place; NSICT Fellowship; IEEE and SPIE member; journal and conference reviewer.
